---

## About

Full Stack Developer with 3+ years of experience building scalable, high-performance web applications using React.js, Node.js, Vue.js, and Django. Adept in full-funnel development from backend APIs to modern front-end frameworks. Experienced in Agile environments, REST API design, CI/CD pipelines, and cloud platforms. Committed to quality code, fast delivery, and cross-functional collaboration.

## Professional Experience

### BPOSeats.com – Cebu, Philippines

#### Full Stack Developer

August 2022 - Present

- Built scalable full-stack features using Vue.js and Django
- Developed and optimized RESTful APIs with PostgreSQL; improved query response times by 50%.
- Created reusable components and integrated schema.org metadata to improve SEO performance.
- Maintained legacy codebase while introducing new functionality, accounting for ~40% of development time.
- Used Git and Gitlab for version control
- Conducted code reviews and wrote unit tests to ensure code quality and reduce bugs by 20%.

#### Front End Developer

June 2021 - July 2022

- Resolved UI/UX issues, reducing support tickets by 25%.
- Improved cross-browser compatibility and performance through responsive design and SASS optimization.
- Contributed to new feature development using Vue.js and REST APIs.
