Professional Summary

Full Stack Developer with over 3 years of experience in creating scalable web applications utilizing **Vue.js, React, Django, Python, and PostgreSQL**. Proficient in RESTful API development, designing component-based user interfaces, and implementing backend logic. Demonstrated success in enhancing system performance, delivering SEO-optimized features, and collaborating within agile cross-functional teams. Knowledgeable in CI/CD workflows, Docker, and cloud-based deployment.

Professional Experience

BPOSeats – Cebu, Philippines

Full Stack Developer • Aug 2022 – Present

- Engineered full-stack features utilizing Vue.js, Django (Python), and PostgreSQL.
- Achieved a 50% reduction in API response times through optimized queries and code refactoring.
- Created reusable components and implemented schema.org markup to boost SEO performance.
- Maintained and updated legacy systems; played a key role in contributing to 30% of new feature launches.
- Leveraged Docker, GitLab, and CI/CD pipelines to guarantee reliable deployments.

Frontend Developer (Part-Time) • Jun 2021 – Jul 2022

- Developed user interface components using Vue.js and Vuex; recognized for consistent performance.
- Fixed UI/UX bugs and enhanced layout consistency across major web browsers.
- Participated in unit testing and cross-team code reviews to uphold quality assurance.

Notable Projects

TaskFlow – Task Management Web Application

- Frontend: React (TypeScript), Vite, Tailwind CSS
- Backend: Java Spring Boot, REST APIs
- Features: Theme selection, task filtering, and task creation/update/delete.

Secure Notes – End-to-End Encrypted Notes Application

- Frontend: React.js, Tailwind CSS, Vite
- Backend: Golang
- Developed encryption workflows and secure API interactions.
